

GREENPOWER F24/F24+ TECHNICAL BULLETIN – 2025/01

IMPORTANT INFORMATION FOR F24/F24+ COMPETITORS

Ahead of the 2025 season, we would like to gently remind all teams of the following requirements contained in the current F24/F24+ Technical & Sporting Regulations:

- **T1.1. The vehicle will only be powered by one 24 volt DC electric motor, supplied by Greenpower. Only one motor may be installed in the car. Hybrid systems are not permitted.**
- **T1.2. The motor is sealed and must not be opened *or* modified.**
- **T13.2. Electronic motor controllers must not be capable of boosting battery voltage, i.e. *at any time the voltage across the motor terminals may not exceed the voltage across the battery terminals.***

Failure to adhere to the above regulations will, at the discretion of the Chief Scrutineer, result in exclusion from the event.

This bulletin has been issued in the interests of safety.
